## **Free DP 2012**

Effective Tuesday, January 3, 2012, we will start taking delivery of Corn and Beans, off farm for Free DP (Delayed Price).

To be eligible for this program, the grain must be delivered on or after January 3, 2012 to a Midwest Coop elevator.

The producer will need to call before delivery and let us know that they want their grain to go into DP. (It will not go there automatically.) We will need to know approximate bushels to be delivered and any splits pertaining to the grain to be delivered.

As soon as the producer is done delivering the DP grain, we will need to be contacted so that we can send out a contract with the exact bushels on it.

**We must have a signed contract in order to get the Free DP.**

The DP grain will not accrue DP charges if priced before August 31, 2012. If the grain is not priced, charges will begin to accrue on Sept 1, 2012. The grain **MUST** be priced by 12-31-12.

No direct ship grain to apply, unless approved by Gayln.
